DISCLAIMER

The information provided in this document is subject to change without notice due to manufacturer changes and/or improvements to the product/s. This instruction manual is based on documented data and research. The manufacturer of this product cannot be held responsible for any changes made to the vehicle by the manufacturer or damages that may occur through the installation of this product in accordance with the steps outlined herein.

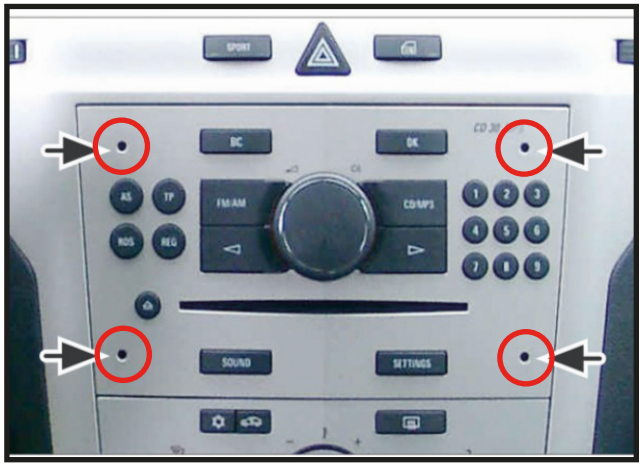

PRIOR TO INSTALLATION

Read the manual prior to installation. Technical knowledge is necessary for installation. The place of installation must be free of moisture and away from heat sources. Please ensure that the correct tools are used during the installation to avoid damage to the vehicle or product. ***Connects2 can not be held responsible for the installation of this product.***

INSTALLATION GUIDE

DASH DISASSEMBLY

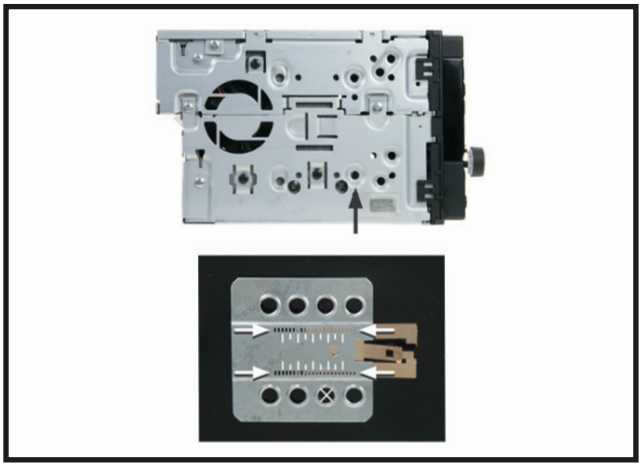

1.

Begin by using a set of radio removal keys in the following holes to release the main head unit. Once released, pull the radio forward and disconnect all of the wiring.

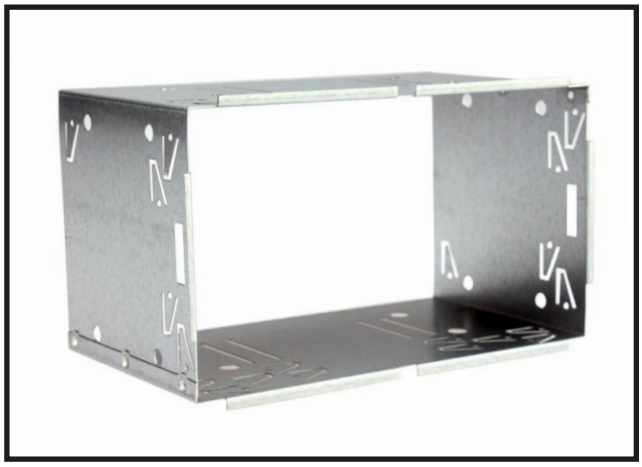

KIT ASSEMBLY

2.

Take the mounting brackets that come within the kit and arrange them onto the relevant sides of the radio as shown in the image. The position/alignment of these brackets can be adjusted for the “perfect fit”.

3.

With the mounting brackets arranged onto either side of the stereo, slot the radio into the cage until it clicks into place. Gauge the depth by test fitting the stereo and adjust the bracketry where appropriate.

Note: this step is only used to gauge the depth, once done, remove the radio from the cage for later in the installation.

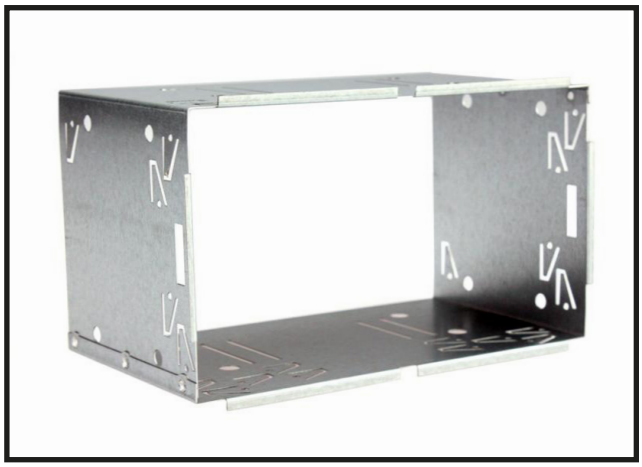

INSTALLATION GUIDE

4.

Attach the mounting frame into the dashboard and screw into place (screws not supplied).

5.

Take the cage within the kit and proceed to push into the dashboard opening once the mounting frame has been fitted. Once seated correctly, bend all the tabs either side to fix into place.

DASH ASSEMBLY

6.

Connect all of the wiring to the stereo and slot into the cage (already installed into the dashboard). Test the radio and proceed to finally place the new fascia plate over top to finish the installation.
